To Committee FMW/1 – Facilities management British Standards Institution

Draft for Public Comment: BS 8210 Facilities maintenance management - Code of practice

Please find attached (separately) the National Fire Chiefs Council (NFCC) response to the Drafts for Public Consultation for *'BS 8210 Facilities maintenance management. Code of practice.*

NFCC is the professional voice of the UK fire and rescue services and is comprised of a council of UK Chief Fire Officers. This submission was put together through NFCC's Protection and Business Safety Committee, of which I am the Vice-Chair. The Committee is comprised of protection and fire safety specialists from across the UK.

NFCC supports the inclusion and identification of the need to maintain fire safety measures in premises. These can range from relatively simple to extensive and complex, and where not maintained, could lead to inefficiencies and deficiencies in performance, as required, to ensure occupants and firefighters are safe in event of fire.

If you wish to discuss this then please contact a member of the NFCC Building safety Programme team who will be happy to assist BuildingSafetyTeam@nationalfirechiefs.org.uk.

Yours sincerely,

Nick Coombe

NFCC Protection and Business Safety Committee Vice-Chair
