

Chinese lanterns

July 2013

Publicity Line

NFCC (as CFOA) called for an urgent review on the use of the floating paper lanterns as they operate in a unregulated and uncontrolled way.

There is now video evidence of a lantern causing a major fire in the West Midlands which has required 200+ firefighters, 39 fire appliances and 3 hydraulic platforms.

NFCC does not support the use of these devices and asks members of the public and event organisers to refrain from using them.

Whilst these lanterns are undoubtedly a popular and beautiful sight, the potential damage they can cause is significant.

NFCC will:

- NFCC urges fire and rescue services to discourage the use of the floating paper lanterns.
- These floating lanterns not only constitute a fire hazard but also pose a risk to livestock, agriculture, camping activities, thatched properties and hazardous material sites.
- Police and coastguards also suffer a loss of resources whilst having to deal with lantern sightings being mistaken as something else such as a distress flare or UFO. Internationally, certain brands of fire lanterns have been banned and there has been a temporary ban on all such products in Australia following a series of wildfires.
- Several opportunities exist to discourage the use of Chinese lanterns. FRSs could:
 - Work with their local trading standards offices to control the use and design of these products
 - Work with their local police authority to discourage the approval of events licences for events that plan to release the lanterns
 - Work with local events licensors to discourage the use of these lanterns
 - Scope out the possibility of litigation with interested parties, local police, civil aviation authority.
